PROFESSIONAL SUMMARY

I am a goal-oriented data scientist with over six years of experience in telling insightful stories with data. I am particularly drawn to high-impact fields of data science, hence my focus on Cancer research over the span of my graduate studies. Data is ubiquitous, and the methods of ploughing through it are numerous and ever-evolving. This presents a challenge that I embrace with excitement, both as a daily task and as a commitment to be on the cutting edge of the field. I am a happy learner, a keen observer and a firm believer that everything I do must be geared towards growth, contribution and impact.
